M5

The **M5** Remote Power Generator provides up to 5kW of electrical power and up to 10kW of heat for glycol heat trace applications.

With a 10,000 hour service interval, the **M-Series** is a reliable, low-maintenance source of AC and DC electrical power for applications where regular utilities are unavailable or unreliable.

M1.5

Provides up to 1.5kW of AC and DC electrical power and up to 3.7kW of heat for glycol heat trace applications.

The compact footprint allows for the M1.5 to easily accommodate existing sites. Low noise and vibration, along with remote start and monitoring options make the M-Series the perfect solution for remote off-grid power.

POWER TO PROTECT

A large yellow tracked excavator is shown in a construction site, working in a deep trench. The machine is positioned on the right side of the frame, with its arm and bucket extended towards the center. The background shows a vast, flat landscape under a warm, golden sunset sky. The overall scene conveys a sense of ruggedness and industrial power.

Power where you need it.®

Anywhere. Anytime. Any place.

As one of the safest and most reliable ways to move product, pipelines require dependable and efficient power to support oil and gas pipeline operations.

The **M-Series** line of generators is built to operate within the harshest environments on Earth. Backed by Global Power Technologies' 40+ years' experience in the design and manufacture of remote, off-grid power generation products, the **M-Series** offers power from 1.5kW to 5kW and can be combined with solar for the ultimate hybrid power solution.

THE NUMBERS

50 Reduce OPEX by over **50%**

75+ Save over **75%** on fuel costs

PIPELINE POWER

TCO Savings over three year period

99.95% Availability

The M-Series offers reliable, uninterrupted and efficient power for any application where power is unavailable or unreliable.

4 Hour Service Time

Save time and money. Easily maintainable in approx four hours, just once every 8,000-10,000 hours

75% More Efficient

Consumes up to 50% less fuel than competitive technologies and over 75% less fuel when combined with solar.
